

Security Alliance

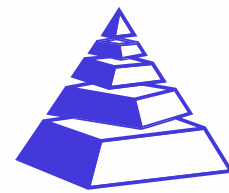

Our primary purpose is to secure the future of crypto

We work with top security researchers, developers, and founders to build and maintain public goods that benefit everyone. Everyday, we fight for the wellbeing of the ecosystem, not for profit but for the ideals that decentralized technology represents.

SEAL 911

The leading incident response team for crypto, trusted by victims when everything's on the line.

Frameworks

An open-source collection of security best practices, curated to help crypto companies enhance their security posture.

SEAL Intel

The hub for crypto threat intelligence, responsible for identifying, analyzing, and disseminating information about new threat actors and trends.

Certifications

A common sense certification program for crypto professionals, designed to provide a clear baseline in crypto security.

SEAL Sponsorship Program

Security Alliance (SEAL) is a nonprofit dedicated to protecting the crypto ecosystem through incident response, threat intelligence, security frameworks, and certification standards. Your sponsorship directly funds the people and infrastructure that make this work possible — while giving your team meaningful access to SEAL's intelligence, community, and expertise.

All of SEAL's core work remains free and open. Sponsorship adds private value on top of public goods.

Why SEAL

In 2025, SEAL handled over 1,800 incident tickets and coordinated 125+ war rooms in response to active exploits. Drainer-related losses fell to \$84 million — an all-time low — down from nearly \$1 billion cumulative over prior years. SEAL's total annual operating cost: \$2M.

1,800+

incident tickets handled

125+

war rooms coordinated

\$84M

drainer losses (all-time low)

~\$1.1k

cost per incident

That works out to roughly \$1,100 per incident handled. A single smart contract audit costs \$50–200k. The Bybit exploit alone was \$1.4 billion — more than 700x SEAL's entire annual budget.

SEAL operates with ~5 full-time staff. The rest — 28 SEAL 911 responders, framework stewards, Intel contributors — are volunteers who donate thousands of hours of senior security expertise because they believe in the mission. Initiative leads are compensated at well below market rate. Your sponsorship funds the coordination layer that makes this volunteer network effective.

Where your money goes: The majority of sponsorship revenue goes directly to people — the analysts, engineers, and coordinators who respond to incidents, produce threat intelligence, and develop security standards.

Current runway: SEAL publishes full financial transparency reports. We operate lean by design — every dollar goes to work immediately, which also means we rely on sustained sponsorship to continue operating. We'll share our current financial position openly with any prospective sponsor.

Supporter \$50,000 / year

Threat Intelligence

- Quarterly threat landscape report (5–8 pages): aggregate trends from SEAL's cross-ecosystem visibility, emerging threat actor TTPs, new attack vectors, and a forward-looking watchlist
- Access to sponsor mailing list for briefings and announcements

Frameworks & Certifications

- Recognized as a sponsor on the SEAL Frameworks page
- Biannual briefing on frameworks roadmap and upcoming priorities
- Guidance on which SEAL-accredited vendors and certification types are most relevant to your stack

Community

- 2 seats in SEAL's private community channels for your security/engineering team

Visibility

- Logo on SEAL website
- Named in SEAL annual report

Partner \$100,000 / year

Everything in Supporter, plus:

Threat Intelligence

- Monthly threat briefing: SEAL's standard landscape update plus a short appendix (1–2 pages) with observations specific to your ecosystem
- Read access to SEAL's ISAC platform (OpenCTI) with curated threat feeds

Incident Response

- Dedicated SEAL 911 hotline: a direct channel between your security team and SEAL 911 responders, established before any incident occurs

Frameworks & Certifications

- Direct input on framework priorities — what new standards should exist and what areas are underserved
- For security vendors: priority placement in the accreditation queue

Community

- 4 seats in SEAL's private community channels
- Invitation to sponsor roundtable where SEAL shares strategic direction and sponsors provide input on priorities

Visibility

- Upgraded logo placement on SEAL website
- Inclusion in SEAL publications and reports

Strategic Partner \$250,000 / year

Everything in Partner, plus:

Threat Intelligence

- Approximately 4 hours/week of dedicated analyst time monitoring threats specific to your ecosystem
- Monthly written summary (2–4 pages) tailored to your chain or sector, plus ad-hoc alerts for critical findings
- Quarterly call (30–60 min) with your analyst to discuss findings and adjust monitoring priorities

Frameworks & Certifications

- Input on the direction of new frameworks and whether new certification categories should be developed
- For security vendors: early access to new certification standards before public release

Community

- 6 seats in SEAL's private community channels

Visibility

- Co-branded content opportunities
- Speaking opportunities at SEAL events
- Featured case study

Principal Partner \$500,000 / year

Everything in Strategic Partner, plus:

Threat Intelligence

- Approximately 8–10 hours/week of dedicated analyst time
- Deeper and more frequent written analysis, monthly analyst call
- Early warning when SEAL Intel identifies threats targeting your ecosystem
- Post-incident analysis and lessons learned (sanitized) for incidents relevant to your ecosystem

Frameworks & Certifications

- Strategic input into program direction for frameworks and certification standards
- Deep integration of your team into the framework development process

Community

- 10 seats in SEAL's private community channels
- Direct relationship with SEAL leadership
- Input into SEAL's strategic priorities

Visibility

- "Presented by" level branding on major SEAL initiatives and publications

Strategic Initiative Sponsor by arrangement

For foundations and organizations that want to fund a specific capability within SEAL. Every engagement at this level is bespoke and scoped collaboratively.

Examples of past and potential initiatives:

- Funding a dedicated security engineer focused on a specific chain's threat landscape
- Underwriting expansion of SEAL Intel's infrastructure and tooling
- Sponsoring a research initiative on an emerging threat category
- Funding development of new detection and monitoring systems

Deliverables and milestones defined per engagement. Reach out to discuss.

What Every Sponsor Gets

Regardless of tier, every SEAL sponsor benefits from:

SEAL's public goods

SEAL 911 emergency response, published frameworks, open-source tooling, and public threat research continue to protect the entire ecosystem, including yours.

Quarterly organizational update

A public newsletter covering incidents handled, framework adoption, team news, and full financial transparency (balance sheet, runway, how sponsorship revenue was allocated).

Structured onboarding

Within the first two weeks, we'll walk through exactly what you'll receive, understand your threat profile, and set expectations together.

Quarterly check-ins (Partner tier and above)

A brief conversation to make sure deliverables are working for your team and to adjust as needed.

Financial transparency

SEAL publishes annual transparency reports and quarterly financial updates so you can see exactly how your sponsorship is put to work.
